

SEMI-WEEKLY INTERIOR JOURNAL.

VOL. XVII.

STANFORD, KY. TUESDAY, NOVEMBER 5, 1889.

NO. 76.

CRAB ORCHARD.

—A. B. Rastin, esp., of Rastin & Collier, is adding to his house near the depot and will be ready to occupy it in a few days.

—November, the fall month for putting out fruit trees, is here, and the "delivery man" makes his appearance in our midst. We note several bunches of fruit trees coming to this place. Mr. J. T. Chantwick is delivery man for one lot and Mr. J. L. Yantis is delivery man for another.

—In 1886 a young lady, Miss Ross, living near this place, died and was interred in Crab Orchard cemetery. Friday her father and brother, accompanied by a friend, Mr. John Smith, came here and had the remains raised and carried them to London to be placed in a cemetery there.

—Mr. D. B. Edmonston and family in a visit to Paint Lick Friday. Mr. J. H. Hilton is preparing to move in the Porter Robinson house near the depot. Davis and Chappell, our clever orators, were in Stanford Saturday. Mr. J. S. Edmonston is carrying the mail to and from the depot while Mr. Vanderpool is confined with a mashed finger.

—Chrisick are all improving. Some very slowly, though. T. Mc Holmes is sitting up. Dr. Blair is a little better. His brother, J. A. Blair, of Harlan, from whom the doctor contracted the fever while waiting on him, is here with the doctor, returning the fraternal care shown him. For the reason that this fever seems transmittable, people are afraid of it. The doctor's family are left almost alone to care for him, which makes it very trying on them.

—Mr. S. Vanderpool some weeks ago in unloading a barrel of coal oil from his wagon, accidentally caught one of his fingers between the end of the barrel and the platform, nearly mashing it off and fracturing the bones. Inflammation set up and he has had a serious case of it. For a time it was thought he would lose the finger and likely his hand, but we are pleased to state a change for the better has taken place and he is now improving.

—The "Cornet Band" of this place gave an oyster supper and dance at College Hall Friday evening, which was well attended and a great pleasure to all. Try it again, says The Messrs. Fish, D. C. Payne and others are making a good band, such an one as any town should be proud of. They have secured a good instructor and are dispensing sweet music every evening. Under the laughing twinkle of innumerable stars of a calm, clear evening, or amidst the clatter of the dripping rain and between the shrieks of the tempestuous winds, sweet strains of music fall cheerfully upon the lonely ear, and its beautiful accord tells how well they improve their time.

DEATHS DOINGS.

—Eli. Ben Chestnut died at Woodbine Nov. 1, aged 64 years, 6 months and 21 days.

—On the morning of Oct. 31st, J. R. Cook died of heart disease at his residence in Cincinnati. He had almost recovered from a complication of troubles and his friends were rejoiced to see him regaining his health and vivacity as of yore, when he was suddenly summoned to release his hold on the flitting trials of life. His had been a useful and busy life and fraught with successes and reverses. A bright mind with excellent moral courage to back it, and rare judgment and foresight, his investments and speculations pushed with skill and industry, had several times yielded largely in his favor and his reverses were due mostly to the lack of these traits in his business associates. Wherever he has lived or managed business the people about him have become his friends, won by fair, manly, honorable dealing, hospitality, generosity and charity. And not these alone, but far and wide sincere friends will sympathize with his devoted wife, who never for a moment tired of attending him with tenderest care and loving solicitude.

A minister, praying over a child apparently dying, said "If it be Thy will, spare." The poor mother's soul, yearning for her beloved, exclaimed, "It must be His will; I cannot bear it!" The minister stopped. Contrary to expectation the child recovered. But the mother, after almost suffering martyrdom by him while a boy, lived to see him hanged before he was two and twenty.

—Martha Wren, an actress, collapsed the editor of a Van Wert, Ohio, paper for calling her a "bar-stormer."

—The wife of Capt. Patrick Gallagher, a conductor on the L. & N. Road, committed suicide in Louisville by throwing herself in front of an engine. She lived long enough to say she couldn't resist an uncontrollable desire to kill herself.

What A Fortune

Is a good healthy, pink skin. Few are aware of the short time it takes for a disordered liver to cause blotches on the face, and a dark greasy skin. One bottle of BEGG'S BLOOD PURIFIER and BLOOD MAKER will restore this organ to its natural and healthy state, and cleanse the blood of all impurities. Its meeting with wonderful success. We guarantee every bottle. A. R. Penny, Druggist.

DANVILLE, BOYLE COUNTY.

—Mr. John H. Woodcock and family, of Lancaster, will come here shortly and spend the winter with his mother.

—Messrs. Fink & Anderson have purchased the lot on which were situated the Proctor & Potts Mills, near the C. & S. depot, for \$1,000, and will erect a flouring mill on the same in the near future.

—The races which were to take place at Cecil Bros' track Saturday and which promised some fine sport, proved almost a failure, as the track was in such bad condition, caused by rains the previous night. Only one heat was run.

—There must have been a good deal of business transacted at the Women's Conference of the Methodist Church Extension during last week, as the meeting was in session two days and the bell was rung promptly on time each day. The next meeting will be held in Lexington.

—There have been several additions to the Christian church. Much interest is being taken and besides the confessions there has been a general warming up of the whole church. Rev. Mr. Tharp, of Versailles, who is conducting the services, is an eloquent and earnest speaker and large crowds are attending the services.

—The Central Kentucky Carriage Co. are tearing out and re-arranging the old Central Hotel building, which they recently purchased, preparatory to putting in machinery and beginning work soon. No doubt this will be a paying enterprise. If we only had more of such enterprises. Every manufactory started adds much to the business of the town.

—The tale will soon be told; the candidates for the different county offices will soon know their fates. The voting begins this morning, Monday. There has been some lively electioneering, almost as if it was the final race. There is not a single man running who is not qualified for the office to which he aspires. It's hard for one to make a choice among so many good men.

Is it safe to drill the earth too much for natural gas? Prof. Joseph E. Jones answers the question in the Popular Science Monthly and his conclusions are of a most alarming nature.

The professor assumes the earth to be a hollow sphere filled with a gaseous substance, called by us natural gas, and he thinks that tapping these reservoirs will cause disastrous explosions, resulting from the lighted gas coming in contact with that which is escaping. He compares the earth to a balloon, floated and kept distended by the gas in the interior, which, if exhausted, will cause the crust to collapse, affect the motion of the earth in its orbit, cause it to lose its place among the heavenly bodies, and fall in pieces.

Another writer thinks that drilling should be prohibited by stringent laws. He, too, thinks there is a possibility of an explosion, though from another cause. Should such a disaster occur, the country along the gas belt from Toledo through Ohio, Indiana and Kentucky will be ripped up to the depth of 1,200 to 1,500 feet, an upheaved over like a pancake, leaving a chasm through which the waters of Lake Erie will come down, filling the Ohio and Mississippi valleys and blotting them out forever.

Still another theorist has investigated the gas wells with telephones and delicate thermometers, and has announced startling discoveries. He distinguished sounds like the boiling of rocks, and estimated that a mile and one half or so beneath the Ohio and Indiana gas belt the temperature of the earth is 2,500 degrees.

The scientist says an immense cavity exists, and that here the gas is stored, that a mile below the bottom of the cavity is a mass of roaring, seething flame, which is gradually eating into the rock floor of the cavern and thence it. Eventually the flames will reach the gas and a terrible explosion will ensue.—The Voice.

The Central Baptist wisely calls the attention of parents to the fact that the Miss Caldwell, whose gift of \$500,000 made the Catholic University in Washington City a certainty, is a niece of the great Presbyterian preacher, Dr. Robert Breckinridge. She was sent by her parents to a Catholic school, and this Catholic University, which will be a terrible power for evil, is the result. When will parents have the religion and common sense and the love for their children necessary to lead them to patronize schools of their own religious belief?—Western Recorder.

Begg's Cherry Cough Syrup

Is giving splendid satisfaction to the trade and the sales are positively marvelous, which can be accounted for in no other way except that it is without doubt the best on the market. Ask for and be sure you get the genuine. We keep it. A. R. Penny, Druggist.

A Good Cough Syrup.

There is nothing parents should be so careful about as selecting a cough syrup. Begg's Cherry Cough Syrup costs no more than the cheap inferior ones, but is worth a fortune on the market. The best none too good to be sure and get BEGG'S CHERRY COUGH SYRUP. We keep it on hand at all times. A. R. Penny, Druggist.

HUSTONVILLE.

—The postponed sale of Samuel Cowan, dec'd, took place on Thursday last. A good crowd was in attendance. Cows brought from \$10 to \$25; horses \$40 to \$100 and other stock at very satisfactory prices.

—Mr. Gideon Caskey, of Jamestown, N. Y., died at Moreland Friday morning of congestion of the lungs and heart disease. He was engaged in the stove business. His remains were embalmed by E. H. Cannitz, undertaker, and were then shipped to New York, accompanied by his brother.

—That combination of a man viz: "Artist and horse thief" called in our midst and with his charming manners and eloquent powers induced a number of our ladies to patronize him and pay a dollar down instead of the modest sum of 50 cents. He also carried away a number of highly prized photographs.

—Judge Sharp, our State Treasurer, accompanied by his wife, has been visiting Samuel Reid's family. The judge came on a hunting expedition, but the weather was so unfavorable that misfortune not only snatched but snickered right out. Dr. White and bride, nee Miss McNeilly, are at Mr. Logan's for a few days. They are en route to Washington City. They were serenaded last eve by the Hustonville Serenading Club. Mr. A. S. Price, the popular young dentist has been with us a month and constantly engaged. This "precinct" claims Mr. Price.

Nearly everybody is familiar with one or more of the various games of letters. The Christian Union describes a new one that may prove interesting and exciting if played by a half dozen wide-awake people.

Put the box of letters in the hands of some steady person who can be trusted as an umpire. He will throw a letter in the center of the table, and the first one in the circle who can tell a geographical name beginning with the letter in sight takes the letter; and the one at the conclusion who can count the greatest number is the winner of the game. Any name of any place under our sun which is of sufficient dignity to possess a postoffice is legitimate to use; any lake, river, mountain or sea. The players must be willing to abide by the decision of the umpire as to who speaks first, and to accept his ruling out of any word which has once been called. I recently saw a circle of gray-heads knitted into excitement and enthusiasm, amid peals of laughter, over the simple amusement. It is curious to see that at the uttermost parts of the earth places are called, and our most prominent cities and States ignored. It is good exercise for children as it teaches their brains to work quickly, and improves their geography; but an adult hand should hold the letter box.

On a recent Sunday in the Sunday-School of the Disciples' church on the Corner of Floyd and Chestnut streets in this city an amusing event occurred. The lesson was about God's rejection of Saul because he spared the Amalekites. At the close the superintendent asked the children to tell him why God rejected Saul. A bright little girl spoke up promptly, "Cause he didn't kill all the Canaanites like God told him." The effect can be imagined.—Western Recorder.

If you won't do the little things God wants you to He won't entrust you with any big things to do. He that is faithful in that which is least is faithful also in much; and he that is unjust in the least is unjust also in much. (Luke XVI, 10.) God tests us by our faithfulness in little things.—Y. M. C. A. Watchman.

A woman seventy years old has just taken out a patent for a sewing-machine needle that does not need threading. There is a beveled slot in one side of the eye through which the needle slips. It seems very simple, and all who have seen it wonder why nobody thought of it before.—Woman's Journal.

—It was Clarksville, Texas, and not Tennessee that got the negro postmaster.

The Lady Next Door.

Mrs. W. envied the lady next door because she always seemed so well and happy. "She enjoys life and I don't," and the discontented woman. "How I would like to change places with her!" At last she made the acquaintance of the object of her envy, and this is what the lady told her. "Happy? Of course I am, for I enjoy perfect health. My dear Mrs. W., your face tells me why you are not happy. You are suffering from functional derangements. I was a martyr in female weakness for years, but Dr. Pierce's Favorite Prescription cured me, as it will you if you try it. It is guaranteed to give satisfaction in every case or price, \$1 returned."

Dr. Pierce's Pellets, one a dose. Cure headache, constipation and indigestion.

DRUNKENNESS—THE LIQUOR HABIT—In all the World there is but one cure, Dr. Haines' Golden Specific.

It can be given in a cup of tea or coffee without the knowledge of the person taking it, effecting a speedy and permanent cure, whether the patient is a moderate drinker or an alcoholic wreck. Thousands of drunkards have been cured who have taken the Golden Specific in their coffee without their knowledge, and to-day believe they quit drinking of their own free will. No harmful effects result from its administration. Cures guaranteed. Send for circular and full particulars. Address in confidence GOLDEN SPECIFIC CO., 135 Race Street, Cincinnati, O.

LANCASTER, GARRARD COUNTY.

—Geo. Denny, Jr., wife and child, of Lexington, were stopping at Miller's Hotel a couple of days of last week.

—The Ladies' Mite Society, of the Presbyterian church, assisted by a few gentlemen, are rehearsing for an entertainment.

—Lish Covington, of this county, sold to Col. William Evans, of Danville, 200 bushels of hemp seed for \$2.25 per bushel.

—John K. Faulkner has been appointed internal revenue storekeeper of this district and stationed at E. J. Curley No. 3, in charge of meal room.

—John E. Greenleaf, of Richmond, was here Sunday to visit his mother, who is rapidly improving after taking "Microbe Killer" one week.

—A Knight of Pythias lodge has been organized and officered at this place. A banquet to the Danville Knights' organization was given at Miller's Hotel Monday evening.

—Giles Saunders, an old citizen of this county, who took unto himself a young wife and moved to Danville about a year ago, has recently moved back to his farm in the Buckeye neighborhood.

—Prof. Raphael Koister, assisted by the music pupils of Garrard College, will give a musical entertainment at the Court-house Saturday evening, Nov. 9. No fee of admission will be charged.

—James A. Burnside and Pony Beazley went to Richmond Sunday so as to be able to put in the whole day at court on Monday. Charles T. Grimes has returned to his farm on the Lexington pike.

—Wm. L. Lawson, a prominent farmer and trader of this county, died of excessive hemorrhages, at his residence on the Lexington pike, on Monday morning. He leaves a wife and several children.

—J. Roe Young was at home Saturday and Sunday on his way to Louisville to lay in a stock of general merchandise for the Middlesboro market. He has rented the storehouse of J. P. Sandifer, at that place, where he will engage in mercantile business.

—Jo Mulhatten—S—n had a good snake story in last week's Enquirer supplement. John (Crimp) Brewer was the hero and a good selection of a hero for such tales as John knows how to kill snakes * * * bite.

—The Democratic Committee, which met Saturday to nominate a candidate to represent Garrard county in the Constitutional Convention, adjourned without making any nomination, thinking perhaps they might be a little premature as the legislature had fixed no time &c., as yet for holding said convention.

—B. G. Mullins, of this county, and P. W. Spencer, of Soshone, Idaho, have concluded their trade. Mr. Spencer gets of Mullins 333 acres of land at \$10 per acre, house and lot in Lancaster at \$5,000, personally, at \$23,840. Mullins gets in Soshone, Idaho, and vicinity 100 acres of land at \$5,000, personal property \$1,650, one irrigated ditch at \$5,000 and a hotel with bar attached, all running at \$7,000. Mr. Spencer has taken charge of property here and turned over by telegraph to W. A. Mullins, son of B. G., all of the Idaho property last week.

—The boiler of a gait mill at Owingsville exploded, killing three men and wounding three.

—To-day, in Massachusetts, the Australian ballot system will, for the first time in this country, receive a practical trial. The circumstances are such as to make the test complete and decisive, for there are three full tickets on the ballot and a partial fourth one. The result will be closely watched and carefully studied.

Bucklen's Arnica Salve

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by A. R. Penny, Stanford, Ky.

Eupespy.

This is what you ought to have, in fact, you must have it to fully enjoy life. Thousands are suffering for it daily, and mourning because they find it not. Thousands upon thousands of dollars are spent annually by our people in the hope that they may attain this boon. And yet it may be had by all. We guarantee that Electric Bitters, if used according to directions and the use persisted in, will bring you Good Digestion and out the Demon Dyspepsia and install instead Eupespy. We commend Electric Bitters for Dyspepsia and all diseases of Liver, Stomach and Kidneys. Sold at 50c and \$1 per bottle by A. R. Penny's druggists.

A Woman's Discovery.

"Another wonderful discovery has been made and that too by a lady in this county. Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she struggled incessantly and could not sleep. She bought of us a bottle of Dr. King's New Discovery for consumption and was so much relieved on taking the first dose that she slept all night, and with one bottle she has been miraculously cured. Her name is Mrs. Esther Lutz." Write W. C. Hamrick & Co., of Shelby, N. C. Get a free trial bottle at A. R. Penny's druggists.

The "Mother's Friend."

Not only shortens labor and lessens pain attending it, but greatly diminishes the danger to the lives of both the mother and the child if used a few months before confinement. Write to the Bradford Regular Co., Atlanta, Ga., for further particulars. For sale by A. R. Penny, Stanford.

WE ARE STILL HEADQUARTERS FOR

LOW PRICES!

Our trade has been so enormous this Fall that we find we will have to re-stock earlier than usual, consequently our buyer is in the city this week and we will open up for

W. P. WALTON.

DEMOCRATIC TICKET.

For County Judge, THOMAS W. VARNON;
County Attorney, JOSEPH B. PAXTON;
County Clerk, GEORGE B. COOPER;
Sheriff, J. N. MENEFEE;
Jailer, SAMUEL M. OWENS;
Assessor, E. D. KENNEDY;
Supt. of Common Schools, W. F. McCLARY;
Surveyor, HARRY A. EVANS;
Coroner, ARCH CARSON.

ELECTIONS occur in 11 States to-day, three of which will choose legislators upon whom will devolve the duty of electing U. S. Senators—Ohio, Maryland and Iowa. There is no doubt about the result in Maryland, though the republicans have been magnifying a little split in some of the democratic factions there. She will return a democrat. Iowa will as before send a republican, while the democrats in Ohio have some hopes of electing a legislature that will continue a democrat in the Senate. Campbell has made a courageous fight for the governorship, but 20,000 majority is too much to overcome and Foraker will likely be chosen his own successor, though well-posted democrats in the State claim otherwise. In Virginia the chances are decidedly in favor of a complete rout of Mahone and the election of a democratic legislature, but as the latter will not have to elect a Senator, that is of secondary consideration. New York will as usual elect a republican legislature, while the democrats, it is claimed, will elect the Secretary of State by a large majority. In the local elections in New York city, the county democracy and the republicans have formed an alliance and will likely defeat the Tammany ticket. But we'll tell the whole tale in our next.

It seems likely the democrats will succeed in stealing Montana. If they do, it means two more democratic millionaires in the U. S. Senate. This is further proof of the democratic championship of popular rights. Commercial-Gazette. This paragraph was inspired by the decision of a U. S. judge that certain precincts, which were thrown out because of minor technicalities, must be counted. In other words that the will of the people expressed at the polls shall not be thwarted by mere matters of form, which do not affect the result. Such comment comes with exceeding bad grace from a republican source, when Harrison and his gang conspired to wrench the State from the democracy, after its citizens had plainly expressed their will in declaring who shall serve them.

The representatives of the governments of Central and South America were welcomed in royal style at Louisville Saturday. Hon. Harvey Watterson delivered the address in Spanish. Gov. McCreary, who had the honor of introducing the bill for a conference of the Nations of North, South and Central America, looking to a closer union, also addressed the body, which was shown every attention possible. After a jaunt through the city, the delegates left for an exploration of Mammoth Cave.

The president signed the proclamation admitting North and South Dakota into the Union Saturday afternoon, and they are now full-fledged States. In his dispatch notifying the respective governors of the act Secretary Blaine says: This is the first instance in the history of the National government of two States, North and South Dakota, entering the Union at the same moment.

The Courier-Journal is opposed to an early convention to nominate a candidate for Clerk of the Court of Appeals and suggests that after the adjournment of the legislature will be time enough. We can't see ourselves what advantage can accrue to the party by rushing the matter, but it might help the candidates, by letting the unsuccessful dozen go to other work sooner.

Get your turkeys in shape. The president has named Thursday, 28th, for Thanksgiving for blessings, past and prospective, and what would make a man feel more like doing so than sitting to a good fat turkey stuffed with oysters and flanked with celery and parsley?

SAM J. ROBERTS will hereafter conduct both the departments of the Lexington Leader, Business Manager Hufman having retired. Mr. Roberts is a good all around newspaper man with energy and ambition and will continue to make a success of the paper.

We were a little premature. Bro. Phillips had already sold the Lebanon Standard to T. B. Fleener and R. L. Nesbit, the latter a nephew of Gov. Knott, who will no doubt keep it on the high plane it has always been conducted.

COL. JOHN O. HODGES, of the Lexington Observer, and H. T. Groom are preparing to issue a monthly trades journal which will start out with a guaranteed circulation of 5,000. The enterprise bids fair to become a most successful one.

A Grand Army Post at Anderson Ind., has adopted resolutions rebuking the administration for the disgrace of Tanner for "dealing liberally with the boys."

The Women's Christian Temperance Union in Baltimore and Philadelphia denounce in unmeasured terms Vice-President Morton, who has opened a hotel in Washington, with a magnificent saloon attached. The prohibitionists at Boston also held an indignation meeting, which likewise denounced Morton, and at which Gov. St. John said: "Look at the spectacle presented to the youth of this nation! A man holding the second office in this great government, one who is liable to step into the presidency, the proprietor of a whisky saloon! Shame on such a man and shame on the party of which he stands forth as the representative!" Meanwhile Morton is going along earning money and caring more for it than the good or bad opinion of anybody.

The November number of the Educational Evangelist, edited and published by Prof. W. E. Shaw, of Mt. Vernon, is out, and a splendid number it is. Its 48 columns are filled with interesting matter, not only to teachers, but to the general reader as well. Prof. Shaw is an educator of excellent ability himself and is deeply in earnest in his effort to improve and benefit the profession. He deserves encouragement in his expensive undertaking. Send \$1 and get his paper for a year, or write to him for sample copy, which will show you how cheaply it can be obtained.

KANSAS is a lovely State to go away from. Its citizens are many of them more than half civilized, while some parts of it seem to be in almost total darkness. At Axtell, for instance, a Methodist preacher lectured against Catholicism, when a fellow got up and called him a liar. The preacher tried to pay no attention to the fellow and continued when he and several others rushed to the pulpit and threw the clergyman out of the window. But what more could be expected of a State that gives 80,000 republican majority?

THE news, which has been confirmed, comes that Judge Lewis attacked the Howards from ambush, near Harlan Court-House, killing six outright and wounding eleven. The outlaws retreated into Virginia. Both sides are being reinforced and more blood will be shed.

NEWS CONDENSED

—The Hunt Hotel at Cincinnati has made an assignment.

—James B. Siler has been appointed postmaster at Dishman, Whitley county, and John M. Wilson at Salvisa.

—Dr. Stanley Field, brother of the Louisville judge, committed suicide at Kansas City by taking prussic acid.

—Nine murderers were sentenced by the U. S. court of the Western District of Arkansas to hang January 16, next.

—Fifty women and girls were caught by the falling walls of a carpet factory at Glasgow, Scotland, and 40 were killed.

—Nick Schaeffer, a hotel proprietor at Topeka, Kas., has been convicted of the sale of hard cider under the prohibitory law.

—The governor has offered \$250 reward for the capture of H. W. Hall, the murderer who escaped from the Harlan jail.

—W. H. Harvey, who last March murdered his wife and two daughters, has been sentenced to be hanged at Guelph, Ont.

—The Chesapeake & Ohio and its branches have cost its present owners \$89,912,126.95, or at least that is what they figure it at.

—Thomas C. Bell, late assistant district attorney, announces himself as a candidate to succeed Judge Barbour, of the Superior Court.

—Adolph Reis, of Louisville, fell from the tower of the Evansville, Ind., courthouse and was dashed to pieces on the ground 80 feet below.

—Percy Dawson, son of Gen. Dawson, late Commissioner of Education, is under arrest in Washington for stealing \$100 worth of stamps from his department.

—John Blanton, a tough youngster from Harlan, is under arrest for robbing a mail carrier in Clay county and rifling the sack, with the proof dead against him.

—While taking eight Apache Indians to the penitentiary, at Yuma, Arizona, Sheriff Reynolds, W. A. Holmes and Engineer Middleton were killed and robbed by the prisoners, who escaped.

—Colorado and Wyoming experienced so heavy a snowstorm and blizzard Friday that railroad travel and telegraphic communication were cut off. Snow was three feet deep at many points.

—The Knox county Court of Claims voted an appropriation of \$15,000 to build an iron bridge across the Cumberland river at Barbourville. There is great rejoicing among the citizens.

—Engineer Seth Twombly and Conductor Charles Buford were indicted for Chicago for the murder of the seven victims of the Rock Island railroad disaster at Englewood, which was caused by their drunkenness.

—Rev. Wm. Dougherty, charged with criminal assault on Miss Mary Reed, has brought suit against two of her relatives for sending him threatening letters, ordering him to leave. All parties live in Nelson county.

—Postmaster General Wanamaker has issued an order fixing the rates for telegraph service for the Government. The scale is a sliding one, 10 cents for 10 words being the minimum, running up to 20 cents according to distance.

—The Republican says that city assessor Foreh has taken the census of Somerset and finds that it has a population of 3,485.

—The deranged daughter of Joseph McGinn, of Shelbyville, put poison in the coffee. Six of the family including herself were made deathly sick, but she was the only that died.

—The south-bound Santa Fe passenger train jumped the track and tumbled down an embankment, near Brownwood Sunday. Four persons were killed and over a dozen received injuries more or less serious.

—Jacob Glucklich, an Austrian Jew recently committed suicide at Hoboken, N. Y., because, as he told his relative, Mrs. Jennie Guttenberg, he was too proud to beg or work. He committed the act on her advice, and she provided the poison.

—A man discovered his wife in a compromising position with her own father at Youngstown, O., and catching the old rascal by the neck, he threw him down the stairs, crushing his skull. He then let loose and whipped the woman within an inch of her life.

—The Brumfields are in possession of Lincoln county, West Virginia. Seeing themselves outnumbered, the McCoy-Haley factions have fled, or are in hiding. A price has been set on their heads. The homes of several of the leaders have been burned and their families turned out without shelter.

FARM AND TRADE ITEMS.

—Black Berkshire boar for sale. G. T. McRoberts, Jr.

—Levi Hubble's large sale of stock occurs to-day, 5th.

—WANTED—4 hogs, to weigh about 325 pounds. T. Richards.

—John G. Lynn sold to A. T. Nunnally a pair of oxen for \$100.

—J. H. Baughman sold to W. P. Givens a buggy mare for \$200.

—John Sims sold to a Pulaski county party 12 yearling heifers at \$13.

—See ad. of sale of stock, &c., by Chas. L. Crow and J. T. Hocker, Nov. 20.

—John G. Lynn sold to John Woods 50 shoats, 100 lbs. average at 34 cents. —No stock was sold here at auction yesterday, the auctioneers still being on a strike.

—Ormonde, the great English race horse, has been sold to the Argentine Republic for the sum of \$70,000.

—The Somerset Reporter says G. L. Yates sold at auction 15 brood mares he brought from Montana, at \$45 to \$90, on six months' time.

—"Melrose," the home of ex-Gov. Aaron V. Brown, near Nashville, Tenn., was sold Saturday for \$33,264 to satisfy a mortgage of \$16,000.

—Thoroughbred Poland China male pigs for sale at the farm of the undersigned, three miles south of Danville, Ky. J. M. Van Meter.

—Chase Bros., the nurserymen of Rochester, N. Y., have purchased a tract of land near Huntsville, Ala., and will start a southern branch of their nursery there.

—The 50 cattle Foresters Reid delivered to Moreland & Lee last week at 44 averaged 1,687 lbs. Of them 25 averaged 1,766 pounds, making the entire lot one of the best ever fattened in this county.

—J. M. Hall received of J. G. and J. E. Lynn, 30 cattle, averaging 1,550 lbs., for which he paid 41 cents a year ago. He took them to Cincinnati and lost about 1/3 of a cent on the pound.

—The Anderson News says Joe A. Cohen delivered 262 cattle at the McBrayer distillery Friday, averaging 1,150 lbs., bought in Nelson and Washington counties and lower Anderson at 23 to 24 cents.

—W. C. Corbett, of San Mateo Stock Farm, California, has an offer from J. E. Green, of Louisville, of \$20,000 for the services of Guy Wilkes for the season of 1899 and a like offer for the year following.

—Lehman Bros. bought 1,000 cattle from various parties in Madison last week weighing 1,500 to 1,400 pounds at 4 cents for export. Numerous other cattle sales were made at 3 1/2 to 4. Ten mule colts sold at \$40.—Register.

—S. H. Baughman exhibited yesterday his two yearling fillies by Conovergan—Conaline and Solace. They are very promising and look as if they will do even better than their relative—Silence. L. M. Lasley's Longfellow colt was also greatly admired.

—A. C. Stagg shucked out 17 shocks of corn that made 102 bushels, or 20 barrels to the acre. New corn is worth \$1.50 shucked at the shock. Live turkeys have been put on sale in our market and are selling at 5 cents per pound on foot.

—Harrodsburg Democrat.

—Senator Roberts bought a quantity of corn, last week, to be hauled and fed to his hogs at \$1.25 per barrel. Sales of 50 head of 352-pound hogs at 4 and a lot of 1,350-pound cattle at \$2.00 are reported. Twenty registered cows and heifers, Shorthorns, sold at Deatherage's sale at \$23.50.—Richmond Climax.

—George Turkington sold to parties in Missouri his imported jack and one yearling for \$1,200 and W. L. Caldwell sold to same a yearling and 2-year-old jack for \$1,000. D. N. Prewitt bought of Ed Price, of Garrard, 55 fat hogs to be weighed Saturday in Lancaster at 34 cents. Jake Hugely sold to Mr. Well, of Lexington, 52 head of fat cattle at \$4.10. E. W. Lee has returned from the Cumberland River country where he has been receiving installments of the 1,100 head of cattle which he recently purchased there at \$1.50 to \$2.40.—Danville Advocate.

BE SURE YOU STRIKE THE RIGHT PLACE.

Before you spend a single cent of your hard-earned cash for Clothing, Dry Goods, Boots, Shoes, Hats, Caps, Trunks, Carpets, Matting, &c., it will be money in your pocket to give us a call before making any purchases. Money saved is money made. If we can't do this we don't want you to buy of us.

SEMI-WEEKLY INTERIOR JOURNAL

STANFORD, KY., NOVEMBER 5, 1889

H. C. WALTON, BUS. MANAGER

MEANS BUSINESS.

Come and settle your account. A. R. Penny. Watches and jewelry repaired and warranted. A. R. Penny. The best place to buy drugs, patent medicines and toilet articles is at A. R. Penny's. Buy your school books, ink, tablets, paper, pencils and school supplies of all kinds from A. R. Penny.

PERSONAL POINTS.

W. G. McKINNEY is down with malarial fever. Mrs. A. L. SPORNAMORE is visiting friends in Madison. Mrs. G. B. COOPER is visiting her parents at Hustonville. Hon. W. T. JONES, of Jessamine, was over Sunday to see to his interests here. Miss AMANDA GOGGIN and little Tim Pennington are visiting friends at Somerset. Mrs. JENNIE LACKY, of Richmond, has been the guest of Mrs. John J. McRoberts. Mr. GEO. H. HAINES, of the Middleboro News, was here yesterday in the interest of his paper. Mrs. H. A. EVANS has gone to Pine Hill to do some surveying at Mr. Wm. Welsh's mines. Mrs. MARGARET HOCKER and Miss Rhoda Lumsden returned Friday from a visit to Missouri. JAMES M. JONES and daughter, Miss Alice, of Rockcastle county are guests of Mr. R. G. Jones. Mr. E. E. WILLIARD is here preparing for the Boston Ideal Minstrels' performance on the 7th. Messrs. R. L. & B. C. POTTS, of Madison, have been visiting their parents, Mr. and Mrs. W. N. Potts. LOUIE DAVISON, who is going over the Cumberland Valley Branch, was down to see his mother last week. Miss JENNIE PUGHAN, of Lancaster, who has been visiting Mrs. R. C. Warren, returned home Saturday. Misses ANNIE and ELEANOR leave today for Sterling and other points in Missouri to spend the winter. Mrs. NELLIE FITCH, of Kansas City, who has been visiting Mr. and Mrs. J. D. Swain, returned home yesterday. Prof. S. J. PULLIAM and Sam Menefee, of Georgetown College, were with friends and relatives Saturday and Sunday. Messrs. J. E. BRUCE, T. J. Foster and G. A. Lackey are in Cincinnati with several car-loads of cattle to dispose of. Miss MATTIE WILLIAMS, of Mt. Vernon, who has been in Chicago for the last two months, passed up to her home yesterday. Mr. E. B. SMITH, of the Mt. Vernon Signal, did us the honor of a call yesterday. Mrs. W. F. RAMSEY returned to Lexington yesterday with Mrs. Louis H. Ramsey, who had been here on a short visit. Mr. M. F. HULET, one of the best and cleverest engineers on the L. & N., has gone to take an engine on the Main Line. Miss FLORENCE PENNINGTON has been visiting the Misses GOSLEY, at Danville, and on Friday night had a delightful party was given in her honor. TOM NEWMAN, the clever clerk of Oakfield Springs, has accepted a permanent position with the Platan Hotel, Hot Springs, which is open the year round. Mr. T. G. NUSSELEY is back from Montana, where he has been probably engaged in the stock business. He likes so it well that he will return in the spring. Miss BIRCHIE WELLS, of Louisville, who was for a month art teacher at the College, has moved to Owensboro, where her father has the pastorate of the First Methodist church. Rev. J. M. BRUCE, of Glasgow, who had his arm broken in the railroad accident at Nolin last week, has accepted from the L. & N. \$2,500 in full settlement for damages sustained. Elizabethtown News. MR. AND MRS. ROBERT HARDING, Mr. and Mrs. A. F. HUNDLEY and Mr. James Slaughter, wife and daughter, Miss Florence, all of Boyle, attended church here Sunday and heard their pastor, Rev. J. W. Lynch. Rev. R. B. MAHONY has accepted the general management of the Penn Mutual Life Insurance Co., at Knoxville, with a salary of \$400 and expenses, and leaves for his post to-night. Mr. Mahony is a most excellent gentleman and we commend him to the people of his new home.

CITY AND VICINITY.

Very fine candles at T. R. Walton's. ANY ONE wishing a wheel drill will do well to see Mr. I. M. Bruce. ARRESTED.—Dupty Sheriff O. P. Newman arrested J. C. Rinehart Saturday on a warrant from Bell county charging him with obtaining money under false pretenses from a Pineville man. He gave bond.

Fresh Salt at T. R. Walton's.

There's fun ahead. Lookout for the Boston Ideal Minstrels.

FISH WANTED.—German Carp to stock pond. Address W. L. McCarty, Kingsville, Ky.

I have just received a new lot of Florence Washing Machines in copper and galvanized iron. M. F. Elkin.

Our friend, Rev. R. B. Mahony, made a nice little deal in Middleboro lots last week, clearing \$5 a foot on his purchases within five days.

New lot of jewelry, watches and silverware just received. All silverware sold will be engraved at reasonable rates. W. B. McRoberts.

Overcoats, overcoats, overcoats, in great variety and from the cheapest to the highest priced at S. L. Powers & Co.'s. Call and see them.

Capt. SPADLIN has run the line by town to McKimney and finds it about a half mile shorter than that at the foot of the knolls. It is, however, a little costlier to build.

The Boston Ideal Minstrels will hold the boards here next Thursday night. They have a splendid band and will give a grand street parade after the arrival of the 2 o'clock train. Be sure to see it.

In the county court yesterday J. R. Bailey was granted license to sell whiskey on prescription at his drug store in Crab Orchard. Grove U. Kennedy qualified as administrator of his father, Peter F. Kennedy.

DR. SPURGEON.—Mr. E. W. Jones, of Crab Orchard, has secured the store room recently vacated by Mr. J. H. Hilton, at Bowland, and will in a few days open up a large stock of drugs and the necessities thereto appertaining.

Jones H. CHAVIS & SONS, with Wm. Barker & Brown, Philadelphia, and Brown, King & Co., New York, offer to the trade 1,000 foreign and American fabrics for men's winter suits, overcoats and trousers. Satisfaction guaranteed.

The first section of freight train 34 had four cars to jump the track on Crooked Hill, between Abamont and Hazel Patch Sunday morning. Nobody was hurt, but the cars were completely torn up. A delay of two hours to the day north-bound passenger was caused.

The Kentucky Central has been ordered to be placed in the hands of L. C. Norman, receiver, till it pays \$50,000 back taxes, which it has refused to do, because of exemptions. The matter will go to the Court of Appeals under an injunction suit.

The Lexington papers say that the picture man, Kemp, had his case for horse stealing dismissed on his promise to pay the money he borrowed on the rig he got from a Lawrenceburg liveryman. It seems that he got hard up and put it in soak to raise the wind.

The mail service on the Knoxville Branch is nearly all in the hands of republicans, yet the London Echo is kicking like a mule on its inefficiency. 'Tis bad, in fact we may say most devilish bad, notwithstanding the Echo promised us better things when a democratic clerk occasionally made a mistake.

CASKEY COUNTY gets her paupers cared for at unusually low rates. The Press says J. M. Chilton was awarded the support of the whites at \$48 and Jas. White the negroes at \$50. The court fixed the poll tax at \$1.75 and the levy at 22 cents on the \$100. Lightning rods were ordered to be placed on the court-house and an iron fence around the square.

RICHARD NEWLAND, deputy sheriff, took the insane German woman, Augustin Gammie, to the Asylum Saturday and delivered her safely to Superintendent Clark. There are sheriffs in the State who would have permitted two or three guards to accompany her, while Sheriff Newland sent his 17-year-old son, thus saving the State a goodly amount.

A fellow with more brass than brains more self-evident than ideas of propriety, came into this office the other day and in a pompous manner asked for paper to write a personal of himself. It was given him merely to see what he would write and not necessarily for publication. The writing was another exhibition of gall, which we could hardly refrain from rebuking. Of course it went into the waste basket.

FIRE.—Sunday night at 9 o'clock, the brick residence of George P. Bright, near Huddle, caught fire on the roof and in an hour the heavy walls, built nearly a century ago, were all that was left of the house that had sheltered three generations. Mrs. Bright and the children were at home at the time the fire was discovered, but Mr. Bright had not returned from church. He got there very quickly afterwards, together with many of the neighbors, and the work of rescuing the furniture was begun. About half was saved in a badly broken condition. There was \$2,000 insurance on the building and furniture, but that does not near cover the loss. Church Yeager and thirteen-berry Bright, Jr., had gone to bed upstairs and they barely escaped with their lives. Their clothes went up in the conflagration and they had to seek the wherewithal to move themselves from a neighbor. The fire seems to have raged from a spark.

New lot of jewelry and watches just received. W. B. McRoberts.

Owing to a change of route the Boston Ideal Minstrels, which were to appear here next Saturday, will give their performance at Walton's Opera House on Thursday night next, 7th.

CIRCUIT COURT.—Judge Morrow did his best to make this jury agree in the case of Tom Wren for killing Joe Baker by holding it from Thursday till Saturday, but it was so badly hung that no show even of a compromise verdict was possible, some being for acquittal and others for long terms in the penitentiary. The rape case against Victor Becker was continued until next term on account of the illness of the girl on whom the offense is alleged to have been committed. Brack Graves was tried in the cases for assault, mentioned in our last issue, and was so badly defended by Hon. R. C. Warren that he was only fined \$1 for assault on A. T. Sannellby, \$1 on Judge T. L. Shelton and \$5 on Isaac Hamilton. Ad Clark, for breaking into Steele's drug store at Hustonville, was given one year. George Farris, a negro boy, refused to testify before the grand jury in some liquor case and he was sent to jail for contempt. Saturday he was brought before the judge and again refusing, he was returned to prison. The grand jury after finding 41 indictments, finally adjourned Saturday. An extensive effort was made to have a number of persons indicted for adultery, in a somewhat noted case, but it failed, except in one instance. Most of the indictments are for minor offenses and the number found is less than for years.

The jury in its report on public buildings, found on the testimony of experts that the Court house is safe and only suggested that the roof be painted. Iron bedsteads were suggested for the jail and a thorough examination of the sewer pipes. The residence also needs painting and the Circuit Clerk's office needs file boxes.

The highest result from the commonwealth cases, which are now ended, is two negroes sent to the pen for one year each.

W. E. ANON was given the full amount of his claim against the K. C. railroad for killing his cattle—\$185. James M. Wray against the Stanford and Hustonville Turnpike was on trial last evening. This is an action for \$3,000 damages on account of injuries received because of the alleged bad construction of the road. At the last court a peremptory instruction was given for the turnpike, but the Court of Appeals ordered the case back for trial. Mr. Wray is represented by Judge R. P. Jacobs, R. C. Warren and W. G. Welch and the turnpike by Col. T. P. Hill, J. W. Alcorn, P. M. McRoberts and D. B. Carpenter. It will not reach the jury before this morning.

Judge Morrow tells us that he will be able to get through with the business by Friday noon, when he will leave for home and thence to the Monticello court, which begins next Monday.

CHURCH AFFAIRS.

—Christ's Church, Lexington, is all in stew because Prof. de Roodie was permitted to be organist at a recent s.w. wedding. The professor seems to be in bad odor with the membership.

—The Methodist Sunday-school has elected Mrs. W. G. Ramey and S. S. Myers delegates and Mrs. J. A. Allen and W. N. Potts alternates to the S. S. Convention to be held at Perryville, the 14th and 15th.

—The will of Ferdinand Phinisey, who recently died in Georgia, makes several large bequests to Atlanta churches on the stipulation that no organ should ever be used in any receiving money from him. The old rascal deserves to be delivered the music of heaven for all eternity.

—The meeting at the Baptist church is progressing most favorably. There have been eight confessions to date and great interest has been aroused. The church cannot hold the crowds that gather to hear the eloquent young preacher, Rev. J. W. Lynch, and numbers are nightly turned away. The meeting will continue till further notice.

MATRIMONIAL MATTERS.

—Sam W. Lackey, of Madison, and Miss Alice Cochran, of Garrard, eloped to Aberdeen last week.

—William Rice and Miss Sallie Churden will be married to-morrow at the bride's father's, Mr. G. W. Camden, near Waynesburg.

—The house that Jack built was sold to Rev. Morris Evans for \$4,000 by Mr. Jack Freeman. It is a beautiful residence.—Richmond Register.

—Naver Stockeler, who got a divorce at this term of the Circuit Court, and Miss Amanda Lockwitz, were married Friday.

—James Barnett and Miss Jennie Sheane, both about sixteen, obtained license and will be married at the bride's father's, near Waynesburg, on Thursday next.

(From the Educational Evangelist.)

We had the pleasure last month of visiting the Stanford public school which was moving along nicely with Mr. W. F. McClary, as principal, and Miss Cattle Thurmond, assistant. The rooms were neat and the pupils orderly and studious.

In Graves county forty-seven new school houses have been built and thirty-four old ones repaired within three years.

NEW ADVERTISEMENTS.

NOTICE!

Those having claims against Mrs. Lucy J. Cook will present them to me, properly proven, at the court next date. J. V. COOK, Lancaster, Ky.

STANFORD RESIDENCE FOR SALE!

If not sold privately before, I will offer at public auction on Monday, Dec. 2, 1889, County court day, on the court-house square, my desirable house and lot of five acres on Danville street, Stauffer, M. C. SAUFLEY, Laramie City, Wyo.

PRINTER WANTED.

An all around printer, to manage a country newspaper. Must be temperate and present good recommendations. Address BOX 24, Middleboro, Ky.

FOR SALE OR RENT.

A LARGE AND COMMODIOUS HOUSE in Lancaster, on Danville street, the old Franklin Institute property, suitable for a boarding house. It is situated on a lot of five acres on Danville street, Stauffer, M. C. SAUFLEY, Laramie City, Wyo.

COAL LANDS, TO LEASE

I want to lease my Coal Lands, in Whitley, in Ky., 500 Acres. The Knoxville branch of the L. & N. railroad passes through these lands. Four openings have been made on them and the coal is first-class. Apply to my agent, Thomas W. Varnon, at Stauffer for terms, &c. MARY E. VARNON.

BLUE-GRASS NURSERIES

A full stock of Fruit and Ornamental Trees, Grape Vines, Small Fruits, Asparagus, Shrubs, and everything for the orchard and garden. We employ no agents but sell direct at low prices to the planter. Personal inspection of our immense stock invited. Description catalogue with valuations suggestions on application. H. F. HILLENMEYER, Lexington, Ky.

BOSTON IDEAL

MINSTRELS

At Walton's Opera House, Thursday Night, 7. Splendid Company of Burnt Cork Artists.

Be Sure and See Them.

PUBLIC SALE.

Having rented my farm in Stanford and Shelby County, 4 miles east of the former place, I will sell all the following property to the highest bidder on Wednesday, Nov. 20, '89.

—The handsome 1-year old saddle stallion, "Navy." This fellow is a dark brown with black legs, no white at all, 15 hands 2 inches high, has fine walk, rack and canter and a good gauged fellow in harness.

—A fine lot of harness mares, a good combined saddle-mare, a fine 1-year old yearling saddle-mare, one of the dam of Navy, by second level, wearing out of same dam by Ederado Wilkes; also a lot of Brood Mares safe in foal to Jack and one to a standard and registered horse; one pair of work Mules, a 2-year old Brood Mare, also a lot of Brood Mares safe in foal to Jack and one to a standard and registered horse; one pair of work Mules, a 2-year old Brood Mare, also a lot of Brood Mares safe in foal to Jack and one to a standard and registered horse; one pair of work Mules, a 2-year old Brood Mare, also a lot of Brood Mares safe in foal to Jack and one to a standard and registered horse.

At the same place and terms I will sell all my personal property, consisting of a Brood Mare, a 4-year old mare Mule, 12 Shuats, 10 fat Hogs, 4 year old mare Mule, 12 Shuats, 10 fat Hogs, 4 year old mare Mule, 12 Shuats, 10 fat Hogs, 4 year old mare Mule, 12 Shuats, 10 fat Hogs.

Dumplings with Royal Baking Powder

No dessert is more delicious, wholesome and appetizing than a well-made dumpling, filled with the fruit of the season. By the use of the Royal Baking Powder the crust is always rendered light, flaky, tender and digestible. Dumplings made with it, baked or boiled, will be dainty and wholesome, and may be eaten steaming hot with perfect impunity.

Recipe.—One quart of flour; thoroughly mix with it three teaspoons of Royal Baking Powder and a small teaspoon of salt; rub in a piece of butter or lard the size of an egg, and then add one large potato, grated in the flour; stir the butter well mixed, stir in milk and knead to the consistency of soft biscuit dough; break off pieces of dough large enough to close over four quarters of an apple (or other fruit as desired) without rolling, and lay in an earthen dish (or steamer) and steam until the fruit is tender. Bake if preferred.

In all receipts calling for cream of tartar and soda, substitute Royal Baking Powder. Less trouble, never fails, makes more appetizing and wholesome food and is more economical. Royal Baking Powder is specially made for use in the preparation of the finest and most delicate cookery.

FOR RENT.

SCIENCE AND PROGRESS.

NOTES AND NEWS OF GENERAL INTEREST TO THE AVERAGE READER.

Direction and Velocity of Winds—How the Velocity Is Measured by Means of the Anemometer—An Anemometer Illustrated and Described.

Winds are currents moving in the atmosphere with variable directions and velocities. There are eight principal directions in which they blow: North, northeast, east, southeast, south, southwest, west and northwest. Mariners further divide each of the distances between these eight directions into four others, making in all thirty-two directions, which are called points or hums. A figure of these thirty-two hums on a circle, in the form of a star, is known as the mariner's card.

The direction of the wind is determined by means of vanes, and its velocity by means of the anemometer. There are several forms of this instrument. The most usual consists of a small vane with four arms, which the wind turns, the velocity is deduced from the number of turns made in a given time, which is measured by means of an endless screw and wheel work. One commonly used and represented in the cut is known as Robinson's anemometer. It consists of a metal cross with hemispheres at the ends, and fixed on an axis. The motion of this cross is transmitted by means of an endless screw to a train of wheel work; and from the number of turns made in a given time, which is indicated by the pointers, the velocity of the wind is deduced. Say, that the mean velocity is from 15 to 30 feet in a second. With a velocity of 30 or 35 feet, the wind is moderate; with 30 or 35 feet, it is fresh; with 60 or 70 feet, it is strong; with a velocity of 80 or 90 feet, it is a tempest; and from 90 to 120 it is a hurricane. The velocity of a wind may, under favorable circumstances, be measured by observing the time which the shadow of a cloud takes to pass over a field or any space, the dimensions of which are known.

Sounding Stones in Britain.
 Not far from the town of Dman, in Britain, are several large stones which have the remarkable property of giving out when struck a clear musical sound. These stones, according to Nature, are composed principally of the mineral known as amphibole, and are of a roughly prismatic shape, about twenty feet in length. They are not erratic boulders brought by ancient glaciers, but have been broken off from the neighboring strata and worn into their present shape by the action of the waters of the river and sea, and at the point where they are found, the waters of the river enter into a small bay and are forced back by the rising tide twice a day.

There are numerous similar stones in the vicinity which show the same phenomena, but none so perfectly as the one described. The property of producing a musical note is very different from that of the "singing sands" which occur in various parts of the world, and is, undoubtedly, simply due to the hard, close grained structure of the rocks, as well as the position in which they are placed, those giving the clearest notes being lifted up from the ground and supported at a few points only by other similar stones. A species of felspar known as phonolite, or clinstone, gives similar sounds when struck by the hammer.

Too Great Vibration in Watches.
 A very troublesome fault with some of the best class of Swiss watches is a too great vibration, causing the balance to strike the bankings. It is most often found in watches having large wheel teeth with straight inclines. The more modern practice is to curve the meeting face of the teeth, and a slight alteration of the teeth diminishing the incline at the heel of the teeth will always diminish the amount of vibration.

American Congress of Doctors.
 The election of officers for the next congress of American physicians and surgeons, to be held in September, 1891, resulted as follows: Dr. Weir Mitchell, president; Dr. W. H. Carnall, of New Haven, secretary; Dr. J. S. Billings, of Washington, treasurer; Dr. William Pepper, of Philadelphia, chairman of the executive committee, and Dr. S. C. Husey, of Washington, chairman of the local committee of arrangements.

Experiments with Iron.
 Iron is acted upon in a powerful manner by most acids. If some nitric acid is poured on iron nails, a stream of red nitrous vapor is let loose, and the oxidized iron is dissolved in the liquid to the condition of nitrate of iron. This experiment is an easy one to perform and it gives an idea of the energy of certain chemical actions. We have endeavored to represent its appearance in the annexed cut.

Fuming nitric acid does not act on iron and prevents its being attacked by ordinary nitric acid. This property has given rise to a remarkable experiment on passive iron. It consists in placing some iron nails in a glass into which some fuming IRON AND NITRIC ACID. nitric acid is poured, which produces no results. The fuming acid is then taken out and is replaced by ordinary nitric acid, which no longer acts on the iron rendered passive by the fuming acid. After this, if the nails are touched by a piece of iron which has not undergone the action of nitric acid, these are immediately acted upon, and a giving off of nitrous vapor is manifested with great energy.

Scientific Gleanings.
 Electricity promises to be the coming medium for transmission of power not only for street railways, but also for mining industries. Locomotive engineers are inclined, it is said, to obesity.

Gum chewers' paralysis is the latest form of professional neurosis recorded in medical literature.

Electricity promises to be the coming medium for transmission of power not only for street railways, but also for mining industries. Locomotive engineers are inclined, it is said, to obesity.

THE CURIOSITY SHOP.

A Custom of Planting Trees for a Bride's Dowry.

There is a beautiful custom in some of the northern parts of Europe. There the white poplar, in good soil, increases a shilling in value every year. The trees are generally cut down at the age of 30 years, as they are then supposed to have attained their full growth. When a daughter is born in the family of a respectable farmer the father, as soon as the season will permit, plants a thousand young trees, which are to constitute the dowry of the maiden, "which grow as she grows and increase in height and value as her virtues and beauty increase."

Minute Living Helios.
 Mites are found not only in cheeses, but in preserves, meal, dried flesh and other articles of domestic consumption. They have as regular a figure and perform all the functions of like creatures that exceed them many times in bulk. They have a sharp snout and a mouth that opens and shuts like a mole's. The various parts of the body are covered with long hairs, and even these hairs are bristly. From the eggs of the females the young are hatched in twelve to fourteen days, and are so small that 100,000 are not equal to a pigeon's egg.

Attributes of Different Leases.
 The principle of magnifying power, effected by convex and concave crystal surfaces, arises from the indolent multiplication of images by surfaces at different angles. A lens with three surfaces of sixty degrees gives three images, one with 180 of one degree each, 180 figures, scarcely separable but one with 10,800 surfaces, of one minute each, gives 10,800 images, still less separable. When, however, the curved form is given, and the sides become infinite, the images are infinite, and, being no longer separable, are seen as one image under one enlarged angle.

A Metallic Meteorite.
 The heaviest purely metallic meteorite known is the "Glenfiddich" of the Arab Sheikh Kalah Ben Assab. It fell in Central Arabia, and is one of the ten known meteorites that have been seen when falling. It was bought by English authorities, who have since caused it to be chemically analyzed. It contains 91.04 per cent. of iron, 7.40 nickel, 0.66 cobalt, traces of copper, phosphorus, and 0.30 of amorphous carbon. Its weight is 120 pounds. Much larger stony meteorites are known, including one of twenty-five tons.

Tropical Rain.
 Rain within the tropics is not of the drizzling character of rain in the temperate zone, but generally falls in such torrents as in other zones would be called waterpots. They produce great floods in a single day. Winter is distinguished from summer chiefly by the quantity of rain, which is often constant for many days together, and lasts a certain number of hours per day through six months. The rivers, in consequence, overflow, and on drying off make the atmosphere unwholesome.

Perfume Does Not Diminish Weight.
 A grain of musk has been kept freely exposed to the air of a room, of which the door and window were constantly open for ten years, during all which time the air, though constantly changed, was completely impregnated with the odor of musk, and yet at the end of that time the particle was found not to have sensibly diminished in weight.

A Convenient Life Preserver.
 It is not a Yankee invention, for it originated in the brain of a Frenchman. Coats and trousers are hereafter to be made with large waterproof pockets, which will contain a small amount of carbonic acid. If the wearer falls into the water, a small outlet will let in just enough water to create a gas, which will float the man for a number of hours.

Height of Sea Waves.
 Careful experiments made by an experienced English navigator at Santander, on the north coast of Spain showed that the crest of sea waves in a long and heavy gale were forty-two feet high, and allowing the same for the depth between the waves would make a height of eighty-four feet from crest to base.

First Cotton in England.
 In 1600 cotton was first brought to England from Cyprus and Smyrna, and made into fastuous, dimities, etc. In 1637 2,000,000 pounds were imported for use, to work with linen warp as a domestic manufacture, the carding and spinning being performed by children and women for rural weavers.

Blue Stockings.
 The term Blue Stocking, applied to literary ladies, was conferred on a society which was called the Blue Stocking club, in which females were admitted, and called owing to a Mr. Benjamin Stillingfleet, one of its active members, wearing blue stockings.

At a Great Height.
 The greatest elevation ever attained by a balloonist was 37,000 feet, about seven miles. The balloon was James Glaisher, F. R. S., and Mr. Coxwell. The ascent was made Sept. 5, 1862, at Wolverhampton, England.

Thin Iron.
 Iron is rolled so thin at the Pittsburgh iron mills that sections are required to make a single inch in thickness. Light sheets through one of these sheets as readily as it does through greased tissue paper.

A Long Sheet of Paper.
 A single sheet of paper 8 feet wide and 734 miles in length has been made at the Victor town Co. V. I. paper works. It weighed 2,207 pounds and was made and rolled entire without a single break.

A Singular Instrument.
 A "gastric scope" is a very costly instrument used to inspect the interior of the stomach and determine the condition of the living membrane. It is an ingenious and delicate machine.

What Doctors Say.
 M. Didier, of Lyons, finds that a faradic current of moderate intensity is decidedly the most efficient treatment of hysteria hitherto employed. It not only checks the paroxysms, but has a curative effect. In every case of hysterical convulsions in which he employed it the seizure promptly abated.

According to Dr. Le Fort, microbes are never conveyed in the air, but only by contact with the fingers, instruments, etc.

A French dentist asserts that antipyrin, a popular new remedy, shows a tendency to blacken teeth, especially when they have lost the enamel.

Dr. A. A. Whitfield says that the homoeopathic preparation of graphites, given three times daily, will cure more cases of eczema in children than any other known remedy.

An ounce and dose of sulphur may be used to cure the cure.

Restoring a Japanese Surface.
 A capital black varnish suitable for covering broken places in metal, such as sewing machines, furniture, etc., where the japanned surface has been scratched or otherwise damaged, can be made, according to good authority, by taking the lump black or ivory black and thoroughly mixing with equal varnish, the black being in a very fine powder. To mix the more readily it might be made into a paste with turpentine.

Sally Linn.
 Three teaspoons of flour, three tablespoons of sugar, the same of melted butter, three eggs, a cupful of milk and three teaspoons of baking powder. Bake the same as cake and eat with butter.

ALL AROUND THE HOUSE.

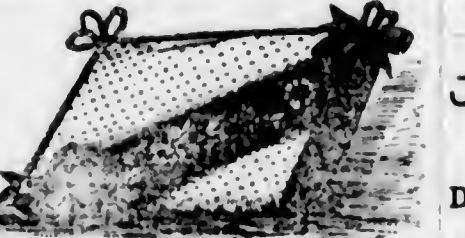

How Ladies Have Made Stained Glass Windows and Japanese Bead Curtains.

How to cut off the unsightly outlook from a window without shutting out the supply of light at the same time is rather a puzzling matter. As the best remedy that admits of still utilizing the window to a certain extent, Decorator and Furnisher advises replacing the clear glass with ground or stained glass, and says: Many ladies are now experimenting in making stained glass windows and frequently with much success, the result being somewhat after the order of crazy patch work.

For a window of stained glass, you can buy for a trifle any quantity of pieces from manufacturers of stained glass. Then having your plate glass window, sash and sill, removed from the casing, lay your window inside upward on a table, and with cement of silicate (which is transparent) attach the pieces of stained glass to the clear glass, filling in the seams with putty. Should you wish a design of somewhat more artistic arrangement, you can dot your window with the faceted jewels and bull's eyes which are made for the purpose, and calling in the assistance of a glazier with his diamond, you can have your pieces of glass cut in better shapes, with much improved effect for the work. By taking notice of stained glass windows you will observe that they are generally in some wise bordered, and thus you can gain an idea as to the composition of the design for your window. Paint the putty used in joining the pieces black; or you can make the work richer by painting the putty with gold.

Another remedy, and one more simple of accomplishment, would be to draw closely over the window a curtain of white spotted cottage-drapery muslin, attaching the curtain by small rods run in a casing of the muslin to both the upper and lower sashes, and then hang over a curtain of Japanese reed and colored glass beads. In the latter orderings now affected in house furnishings, it is not unusual to see a difference in the treatment of windows in the same room, if the purpose be obvious, and it does not seem incongruous. As the better quality of cane curtains are expensive, the authority already quoted suggests that the cane and beads can be bought and strung on strong flax thread, and with some degree of taste exercised in arrangement it would be no difficult task to make a curtain-hanging in a room furnished with small metal eyes. With the white muslin curtain for a background, the bead curtain would be very effective, there would be a mellow light and one would scarcely be annoyed by unwelcome views from neighbor's premises.

A Handsome Sachet.
 Gold guipure net is used for the outer covering and copper colored satin, quilted and perfumed, for the lining of the elegant sachet shown in the cut.

AN EMBROIDERED SACHET.
 The embroidery on the front side of the sachet is worked on bronze plush, the larger flowers with white silk in satin stitch shaded off with copper colored silk, the center star with gold thread. The leaves are carried out in olive chenille and the smaller blossoms formed of gold chenille, the embroidered stripes being edged with gimp and two bronze ribbon bows placed at the corners.

Little Batter Puddings.
 When company arrives unexpectedly to dinner, little batter puddings will be a convenient dessert. It can be made at the last minute and baked while the dinner is being eaten.

Three eggs, one pint of milk, twelve tablespoons of sifted flour, a little salt. Bake in small earthen cups. Pudding sauce: One cupful of sugar, one-half cupful of butter, beaten to a cream, add the yolk of one egg well beaten, then one cupful of boiling water, and set it on the fire about ten minutes, add two tablespoons of wine, or flavor with lemon peel, beat the white of the egg to a froth and pour over the top after having poured the sauce in the sauce-dish. This recipe makes twelve little puddings. Bake in a hot oven, but not so hot as to burn them on top before baking the bottom. They will fall if taken out too soon.

Rich Quince Preserves.
 Pare, core and quarter your fruit, using a pound of white sugar to every pound of fruit. Take the peelings and cores and put them into a kettle, cover them with water and boil for half an hour, then strain through a fine sieve or jelly bag and put the juice back into the kettle and boil two quarts of it, a few at a time, until they are tender. Lift out, as they are done, with a drainer and lay on a dish. When all are cooked, put in the sugar and allow it to boil about ten minutes before putting in the quinces. Let them boil slowly till they change color. While boiling slip a silver spoon under them occasionally to see that they do not burn, but do not stir them. This makes a rich and handsome preserve.

Canned Squash.
 A housekeeper says, I have canned squash very nicely after the following recipe, and we find it very good and fresh when kept the same as canned fruit. Boil the squash and strain through a colander. If very dry add a little water. Fill glass jars with it, screw covers lightly on and set into a boiler of cold water with straw or perforated board in the bottom of the boiler. Bring the water to boiling and cook an hour or more in all. Then take out the cans, and if the contents have shrunk fill up with hot water and seal at once.

Tulips for Winter Forcing.
 Of early kinds the single Duc Von Thol tulips are the earliest, and are therefore most valuable for forcing in pots or vases for indoor decoration. With proper treatment these can be had in bloom by Christmas or earlier. They are of different colors—brilliant scarlet, vermillion, crimson, pure white, purple, orange, violet, etc. Planted in pots or vases they prove very beautiful at a season when blooming plants are generally scarce. Single early tulips can also be grown in water, like a lily.

Restoring a Japanese Surface.
 A capital black varnish suitable for covering broken places in metal, such as sewing machines, furniture, etc., where the japanned surface has been scratched or otherwise damaged, can be made, according to good authority, by taking the lump black or ivory black and thoroughly mixing with equal varnish, the black being in a very fine powder. To mix the more readily it might be made into a paste with turpentine.
